

NetCapture™

New From CU Business Group

Remote Deposit Capture for Business Members

The rapid adoption of Remote Deposit Capture in the commercial marketplace demonstrates the value and appeal of check image technology. Now your credit union can extend that value to business members who will appreciate the convenience of RDC and the ability to spend more time focused on their core business.

CU Business Group provides two levels of commercial Remote Deposit Capture applications that are available to suit small- to large-volume capture scenarios of your business members:

NetCapture™ Small Business

NetCapture™ Small Business is an affordable, easy-to-use Remote Deposit Capture application for small businesses. It is ideal for businesses that need to deposit a small quantity of items per day and utilize the ease and convenience of browser-based technology. Additionally, NetCapture Small Business works with the common TWAIN-compatible flatbed scanner or all-in-one device your members may already own.

NetCapture™ Business

NetCapture™ Business is a full-function, Web-based Remote Deposit Capture application that is suited for businesses that have larger check volumes and want to utilize the convenience of browser-based technology. Business members with multiple locations will benefit from the low cost simple check capture process, advanced centralized reporting and accounting system updates.
