

NetCapture™

Consumer

New From CU Business Group

NetCapture Consumer

NetCapture Consumer is a Web-based Remote Deposit Capture application suited for the credit union's consumer members. It is ideal for members who:

- Receive a small number of checks for deposit
- Don't want to buy a separate remote deposit scanner
- Want to avoid making trips to the branch or reside outside the branch footprint

The rapid adoption of Remote Deposit Capture in the marketplace demonstrates the value and appeal of check capture technology. Extend that value to your members. They will enjoy the convenience of online deposits while saving time and money by eliminating trips to make deposits.

NetCapture Consumer works with inexpensive home/office scanners and all-in-one devices they likely already own. The system has a highly intuitive and easy-to-master interface that will make capturing and submitting check deposits simple for all of your members, even those who only make occasional deposits.

Benefits

- Make it easier for your members to do business with the credit union
- Reach members outside of your geographic footprint
- Low cost for the member and the credit union
- Late cutoff time extends the business day for your members
- Next day availability for qualified members
- Full operational support for the credit union and business members

Features

- Straightforward and intuitive Web-based interface for creating electronic deposits
- Safe and secure SAS70 compliant systems
- Branding of the application with your credit union's logo
- Phone center help desk support for both the member and the credit union
- Support for single and multiple-item deposits
- Works with TWAIN-compatible scanners and all-in-one devices
- Secure with multi-factor authentication that meets FFIEC risk management guidelines
- Risk mitigation features, including duplicate detection for previously deposited items
- Courtesy and Legal Amount Recognition (CAR/LAR) assists deposit preparation by optically reading the check amount
- Image Quality Analysis (IQA) automatically detects image quality issues that could impact settlement
- Deposit receipt confirmation via email
